

Baker County Wind Speed Line

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?

The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Baker County Wind Speed Line Description

The 100 mph wind speed line divides Baker County into one of two wind load areas: 90 or 100 mph. The 100 mph "wind speed line" is hereby designated as that line lying between (1) a Southerly point located where the Baker, Bradford, and Union County lines intersect one another, or more particularly defined by geographical coordinates as determined by global positioning system (GPS) as 30°14'23.59" North and 82°11'34.68" West, and (2) a Northerly point located where the St. Mary's River and Cedar Creek intersect one another, or more particularly defined by GPS as 30°36'03.34" North and 82°17'21.51" West. For the purposes of complying with the structural requirements related to wind loads, all buildings and structures East of this line shall be designed for a minimum load of 100 mph and all buildings and structures West of this line shall be designed for a minimum load of 90 mph.

Ordinance Adopted April 15, 2002
Effective June 14, 2002

Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems

Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
