

## Baker County Wind Speed Line

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

### TESTED ?

The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

**Baker County Wind Speed Line Description**

The 100 mph wind speed line divides Baker County into one of two wind load areas: 90 or 100 mph. The 100 mph "wind speed line" is hereby designated as that line lying between (1) a Southerly point located where the Baker, Bradford, and Union County lines intersect one another, or more particularly defined by geographical coordinates as determined by global positioning system (GPS) as 30°14'23.59" North and 82°11'34.68" West, and (2) a Northerly point located where the St. Mary's River and Cedar Creek intersect one another, or more particularly defined by GPS as 30°36'03.34" North and 82°17'21.51" West. For the purposes of complying with the structural requirements related to wind loads, all buildings and structures East of this line shall be designed for a minimum load of 100 mph and all buildings and structures West of this line shall be designed for a minimum load of 90 mph.

Ordinance Adopted April 15, 2002  
Effective June 14, 2002

Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems

Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
