

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

Bay County Wind Speed Line Description

The 110 mph wind speed demarcation line for Bay County shall be Highway 20.

Notes: Construction within 1500 feet of Coastal Control Line will require Design Professional. Within 1 mile of the Gulf Coast is the Wind-Borne Debris Region, Code requires window protection.

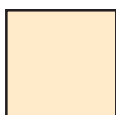

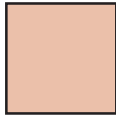

Ordinance Adopted December 18, 2001
Effective January 1, 2002

Bay County Wind Speed Lines

-  Bay County Wind Line
-  Major Roads
-  County Boundary

TESTED ?
The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

-  Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems
-  Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
