

Bradford County Wind Speed Line

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?

The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Bradford County Wind Speed Line Description

The 110 mph wind speed line divides Bradford County into one of two wind load areas: 100 or 110 mph. The 110 mph "wind speed line" is hereby designated as that portion of Highway 301 which lies north of County Road 225, and that portion of County Road 225 lying east of Highway 301.

For the purposes of complying with the structural requirements related to wind loads, all buildings and structures east of the 110 mph "wind speed line" shall be designed for a minimum load of 110 mph and all other buildings and structures shall be designed for a minimum load of 100 mph.

Ordinance Adopted and Effective
June 3, 2002

2.5 1.25 0 2.5 Miles

Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems

Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
