

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?
The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Collier County Wind Speed Lines

Collier County Wind Speed Line Description

The Official Zoning Map Atlas with the wind speed lines overlaid in one mile-per-hour increments was adopted by reference as Exhibit A of Collier County Ordinance 2002-01. Any such maps depicting the exact location of these wind speed lines will be applied to all construction and will be enforced by Collier County in the unincorporated portions of the County.

Ordinance Adopted January 8, 2002
Effective March 1, 2002
