

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

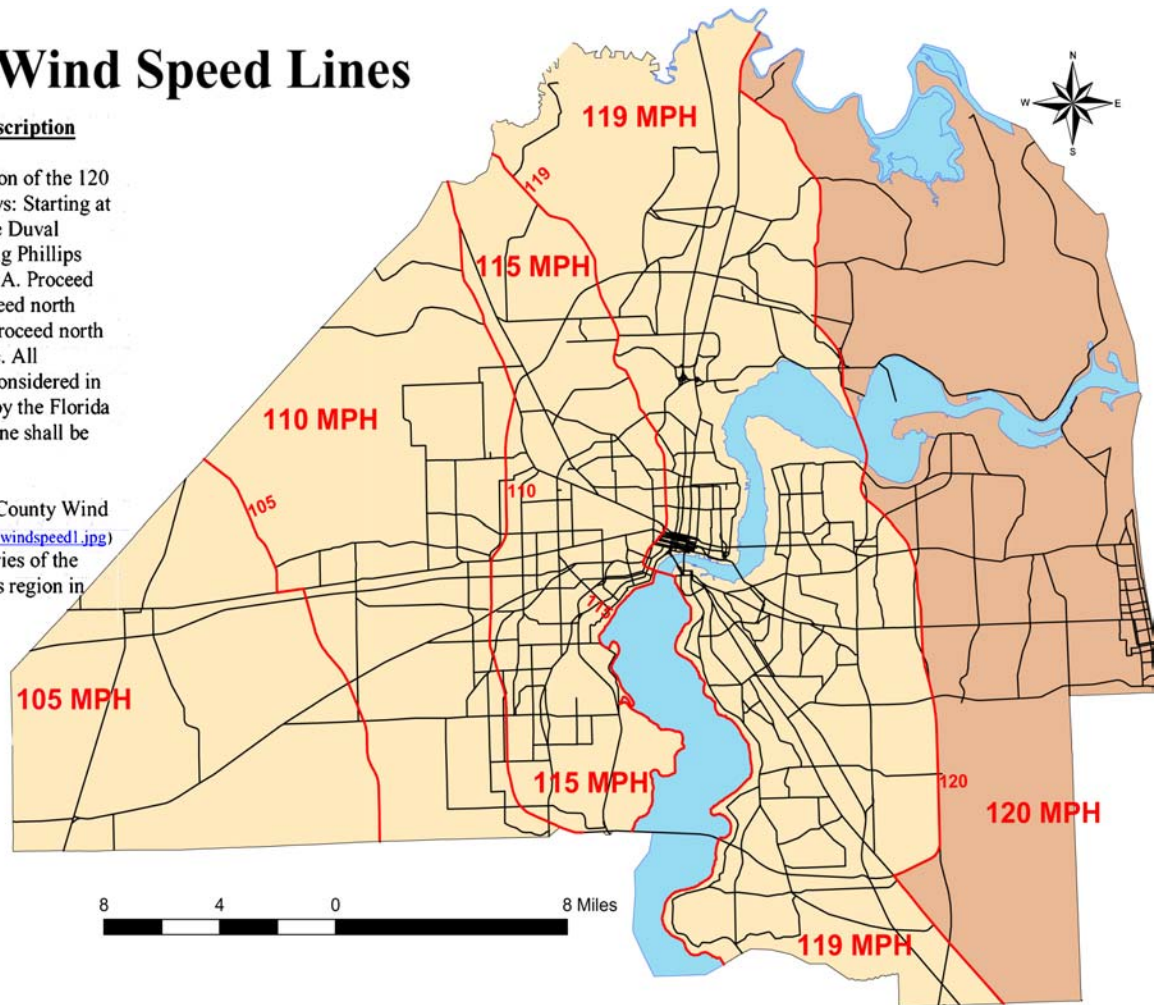

TESTED ?
The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Duval County Wind Speed Lines

Duval County Wind Speed Line Description

For purposes of structural design, the location of the 120 mph wind line for the city shall be as follows: Starting at the intersection of Phillips Highway and the Duval County line at the south, proceed north along Phillips Highway to the intersection of State Road 9A. Proceed north along 9A to Yellow Bluff Road. Proceed north along Yellow Bluff Road to Highway 17. Proceed north along Highway 17 to the Duval County line. All structures located east of this line shall be considered in the Wind-Borne Debris Region as defined by the Florida Building Code. All structures west of this line shall be designed for 119 mph three-second gust.

Wind Line locations taken from the Duval County Wind Speed Zones Map (<http://www.coj.net/pw/bid/fyi/windspeed1.jpg>) which established the geographical boundaries of the wind speed zones and the wind borne debris region in Duval County.

Duval County Wind Speed Lines
