

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

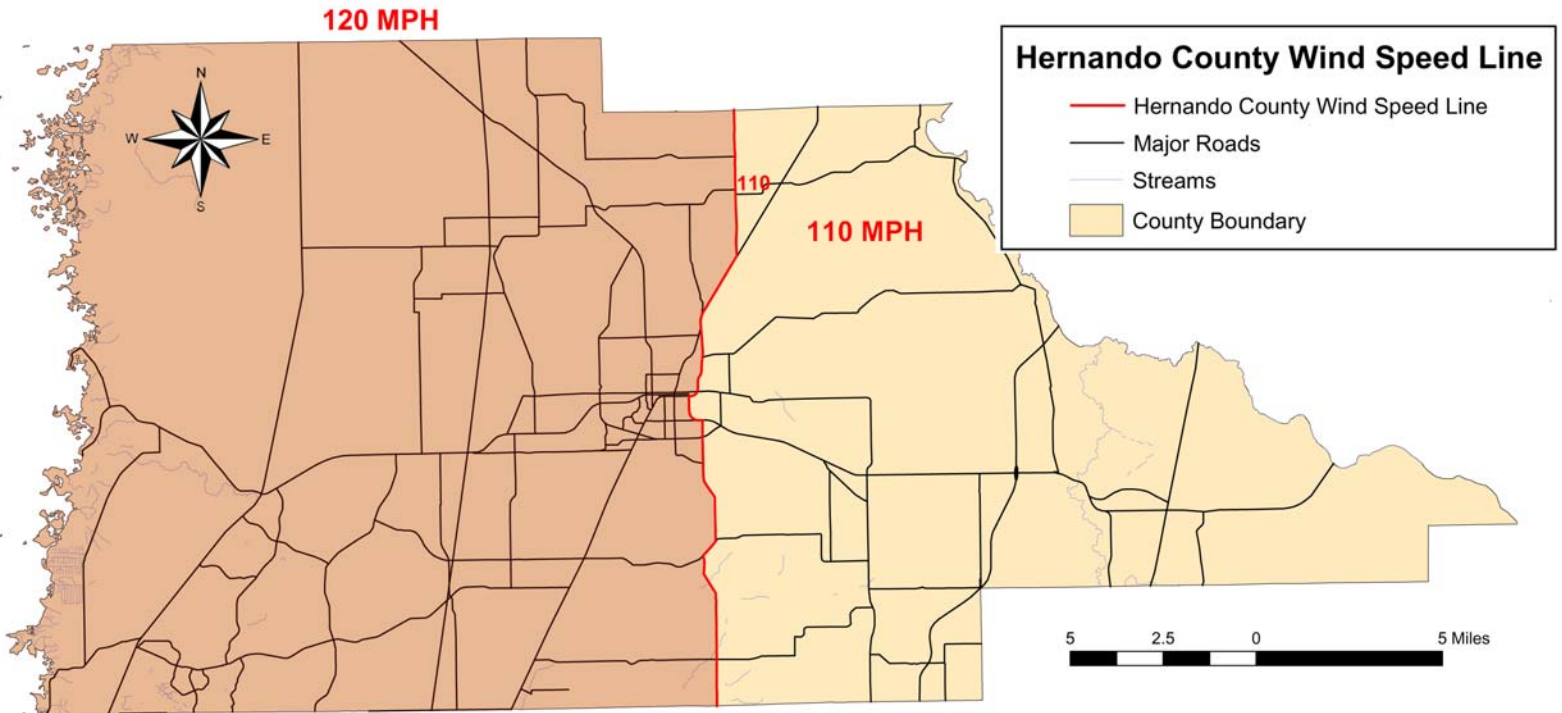

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?
 The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Hernando County Wind Speed Line

Starting at the Pasco-Hernando county line going north to Culbreath Rd (C.R. 581) to Powell Rd. (C.R. 572) east to Emerson Rd. (C.R. 581) north to Jefferson St. (S.R. 50A) west to Broad St. (S.R. 41) north to Snow Memorial Hwy (C.R. 481) and north to and ending at the Citrus-Hernando county line.

Areas west of the wind speed contour line shall be designated as a 120 mph wind zone, and areas east of the wind speed contour line shall be designated as a 110 mph wind zone.

- Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems
- Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
