

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?
 The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Martin County Wind Speed Line

Martin County Wind Speed Line

- Martin County Wind Speed Lines
- Major Roads
- County Boundary

Martin County Wind Speed Line Description

The Florida Turnpike forms the wind speed line between the 130 MPH and the 140 MPH wind speed zones in Martin County. Areas to the west of the Turnpike are in the 130 MPH zone, areas to the east of the Turnpike are in the 140 MPH zone.

Ordinance Effective March 1, 2002

- Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems
- Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
