**RESEAL INSTRUCTIONS
 EXTRUDED ALUMINUM DECO RING**

**CLASSIC SERIES
 FGC, VGC, FHP, TG, CMG**

- 1 Slide a thin blade between the glass and the deco ring to cut the seal.
- 2 Tap the clip that holds the two ends of the deco ring together to one side until one end is free.
- 3 Remove the deco ring, being careful not to bend the ring.
- 4 Remove dry silicone from the underside of the deco ring. Wipe the area with isopropyl alcohol and allow it to dry. Paint the area that will come into contact with silicone with primer and allow it to dry.
- 5 Inspect the silicone seal for any gaps or cracks that may be causing the leaking. An area that has been leaking may be discolored.
- 6 Remove the silicone from the leak area and for 3" on either side of the leak area. **CAUTION: DO NOT REMOVE THE BLACK GASKET THAT IS UNDER THE SILICONE.**
- 7 Remove any loose debris and wipe area with isopropyl alcohol and allow it to dry. Apply primer to all areas that will come into contact with silicone.
- 8 Fill the void using silicone that contains acetic acid (smells like acetone) from the bottom up to 1/4" above the glass.
- 9 Replace the deco ring making sure it is firmly wrapped around the frame.
- 10 Replace the clip at the bottom of the deco ring first. Press down the top of the clip over the deco ring and tap lightly with a rubber mallet.
- 11 Clean off any excess silicone.
