

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?
 The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Indian River County Wind Speed Lines

Indian River County Wind Speed Line Description

Wind Speed Lines were taken from Ordinance No. 2002-008, Exhibit A "Indian River County Wind Speed Map". Per the ordinance "this wind borne debris region coincides with Figure 1606 of the Florida Building Code and has a basic wind speed of 120 miles per hour or greater. Wind borne debris requirements of the Florida Building Code apply in the region seaward of the 120 miles per hour map contour lines."

Ordinance Adopted March 5, 2002
 Effective March 13, 2002
