

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?

The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Lake County Wind Speed Line

Lake County Wind Speed Line Description

The exact location of wind speed lines shall be determined by overlaying the GIS line (ASCE 7-98) provided by the Department of Community Affairs (DCA) on the corresponding GIS map of Lake County streets, roads and highways. Determination of wind speed, with respect to structures bearing on the wind line, shall be made by the Building Official.

Adopted December 28, 2001
Effective Date January 1, 2002

Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems

Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
