

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylights, has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph(or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer the right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

TESTED ?
 The Sun-Tek *Extreme Weather Skylights* have passed the strictest testing of the Metro Dade approval process and meet or exceed all Florida Building Codes.

Pasco County Wind Speed Line Description

The Wind-Borne Debris Region and Basic Wind Speed Map establishes the geographic boundary of the wind-borne debris region in Pasco County. The wind-borne debris region coincides with Figure 1606 of the Florida Building Code and is attached to and made part of ordinance 01-25.

Ordinance Adopted December 18, 2001
 Effective March 1, 2002

- Satisfied by conventional Sun-Tek Classic, Dura & Sun-Tek Tube skylight systems
- Requires Sun-Tek *Extreme Weather* line of High Wind & Impact skylight systems for building code requirements
