

The *Extreme Weather Skylights* from Sun-Tek, our most recent addition to a family of high quality skylight has the widest and most complete range of hurricane, tornado, high velocity and impact units of any skylight manufacturer to date !

- These high impact & wind velocity units are available for 120 mph (or greater) wind zones. Sun-Tek's standard line will satisfy all other zones.
- From the Sun-Tek Tube... to insulated Classic Glass... to Polycarbonate, Sun-Tek can offer right application for any wind zone requirement.
- Concerned about future coastal zones ? - We are confident you will not need to go anywhere but to Sun-Tek's *Extreme Weather* line to satisfy all your extreme weather skylight needs.

Volusia County Wind Speed Lines

Volusia County Wind Speed Lines Description

The 120-mile per hour basic wind speed line shall be described as a line which begins at the southeast corner of section 37, township 20 south, range 33 east, thence northwesterly to the northeast corner of section 29, township 14 south, range 31 east.

The 110-mile per hour basic wind speed line shall be a line corresponding to that portion of the county line which begins at the intersection of the thread of the St. Johns River with the southern county line, thence northerly along the county line into Lake George, to its intersection with the northern county line.

Ordinance Adopted December 12, 2001
Effective March 1, 2002
